

- In-Situ Mold Remediation is revolutionizing the Mold Remediation Industry. The use of specialized products and applications to clean and disinfect to eliminate the Mold Growth Spores in the affected areas, ensure people to resume their routine in a safe ambience. All Mold Assessment & Remediation are under the Institute of Inspection Cleaning and Restoration Certification (IICRC), specifically IICRC S520 and the Standard Reference Guide for Professional Mold Remediation.
- In-Situ Mold Remediation can be performed **in** houses, apartments, buildings, offices, theaters, hotels and casinos, schools, boats or any contaminated area.
- Indoor Air & Surface Quality Testing, including the SARS-CoV-2 (COVID-19) virus sampling and remediation.
